

All-payor claims for professional liability companies

All-payor claims data from Definitive Healthcare aggregates longitudinal patient interactions across all care settings, providing you with the real-world evidence (RWE) needed to inform business strategy. Access claims data integrated within a broader suite of real-world data (RWD), empowering your team to understand market trends, build better go-to-market strategies, and inform product development.

All-payor claims data allows you to:

- 1** Quickly respond to changes in the market with de-identified all-payor claims data that are processed in near real-time and integrated into our platform monthly.
- 2** Segment the market using insights into the work that HCOs and HCPs actually do.
- 3** Increase commercial team effectiveness and remove unnecessary complexity by combining all-payor claims data with detailed HCO and HCP profiles.

Get started with these three claims use cases:

FASTER PROSPECTING

Discover and target the highest-value physician groups by tailoring your search with geography and specialty filters.

IMPROVED UNDERWRITING

Use factors like patient volumes and procedure complexity to more effectively determine risk and inform pricing models.

EASIER QUALIFICATION

Better quality inbound leads with a combination of Medicare claims and other DH intelligence.
