

Essential healthcare commercial intelligence for higher education professionals

→ Give your faculty and students access to the critical data they need

Healthcare moves fast. From changes in the regulatory environment to advances in standards of care, there are always new opportunities to use fresh data to drive your educational or research efforts. With Definitive Healthcare, you'll have access to hospital and physician profiles, diagnosis and procedure claims, and more to help make sure your students are ready to make an immediate impact after graduation.

- 1. Understand healthcare trends:** Utilize medical procedure claim information to understand how healthcare is being delivered.
- 2. Bolster your curriculum:** Blend theoretical ideas with practical real-world data to help focus your classroom or research work.
- 3. Recruit speakers:** Identify experts across a wide variety of therapy areas to guest speak during lectures or appear at conferences.

ELEVATE YOUR INSTITUTION WITH COMPREHENSIVE INTELLIGENCE

Save time

Access combined data from disparate industry sources (like NPI registry, CMS Medicare Standard Analytical Files and Cost Reports) with our own proprietary research, so you can spend less time searching and reconciling fragmented data sources.

Raise your national profile

Increase student satisfaction with data and analytics tools that prepare them for real-world scenarios.

Advance student outcomes

Improve placement rates for students into both jobs and graduate programs by giving them transferable real-world skills.

FIND AUTHORITATIVE VOICES

Use our expert search to find a guest speaker for your next class, campus lecture or student group event.

Annual Medicare Data is from the Centers for Medicare and Medicaid Services (CMS) Medicare Standard Analytical Files (SAF). Complete calendar year data is projected to be released CMS. The most recent annual Medicare data is from calendar year 2020; 2021 data is scheduled to be released in fall 2022.

YTD Medicare data is from the 2021 Medicare Quarterly SAF, which has an approximate 93% claims maturity for each quarter. Quarterly claims data is released by the CMS approximately months after the end of each quarter. New claims data is expected to be incorporated into the Definitive Healthcare database within 4-5 weeks.

All-Payor Estimates are based on Definitive Healthcare calculations and algorithms.

Your search returned 5,856 results.
